Notes

Source: GAD 21 Feb

1. The above rates are to be deducted from military pay (including any length of service pay).
2. Some age 53 rates are above the 15% contribution limit. They are included in the above table so that the price of a part-year purchase may be determined.
3. The above rates can be used for both DPA 60 & DPA 65 contracts, but DPA 65 contracts should have a factor of 1.25 (an increase of 25%) applied to the number of added years if a member leaves with deferred benefits. This increase would be applied after the added years have been scaled down to reflect that contributions have not been paid for the full period. No increase is applied for DPA 60 contracts and for any contracts where a member receives IP benefits.
