EXPLANATORY NOTE

(This Note is not part of the Licence)

1. This Licence has been amended following a review of the permitted destinations.
2. This Open General Export Licence permits, without further authority but subject to certain conditions, the export of certain goods, software or technology (including their transfer by electronic means) to UK armed forces, or the MOD notified civilian contingent. In particular it covers export and transfer of military and dual-use goods, software and technology except to the countries specified in Part A of Schedule 2; the provision of technical assistance for “any WMD purposes” except to the countries specified in Part A of Schedule 2; and the supply of goods and services to any warship or Naval Auxiliary of the United Kingdom or Government Service ship. There are certain military items that are completely outside the coverage of this Licence (anti-personnel landmines and certain items that could be used for inhuman or degrading treatment or punishment and related software and technology) and certain military items (small arms and light weapons and related software and technology) where there are additional restrictions on destination. **This licence does not authorise the export or transfer of dual-use goods, software or technology to the extent that their export or transfer is prohibited by the Council Regulation (EC) No.428/2009.**
3. The goods, software, technology or technical assistance may only be exported, provided or transferred under this Licence if certain conditions are satisfied. These include that the goods, software or technical assistance are intended for UK Forces, or the MOD notified civilian contingent including CONDO; and if the goods, software, technology or technical assistance are classified as CONFIDENTIAL or above prior written approval for the export, provision or transfer must have obtained in writing approval from the Ministry of Defence.

5. An exporter who exports goods under the authority of this Licence must before his first exportation under the Licence, inform the Secretary of State of his intention to export goods under this Licence and of the address where copies of the said records may be inspected.

This notification must be made via the Export Control Organisation's electronic licensing system, SPIRE, at www.spire.bis.gov.uk.

6. The Secretary of State has the power to suspend or revoke licences at any time and in such circumstances and on such terms as he thinks fit. If an exporter receives written notice to this effect, he will be prevented from relying on this Licence. The power to suspend may be used in addition to criminal prosecution or as an alternative. Suspension may occur for example where an exporter is being investigated or prosecuted in relation to a possible criminal offence, or has been found guilty of a criminal offence under the

export control legislation. It may also be used in situations where an exporter has breached the conditions of the Licence and failed to take corrective action within a reasonable period (see condition 3(5)).

7. Where, the ECO identifies failures in compliance with licence conditions or the legislation during a compliance visit, the ECO may send a warning letter to the exporter listing the improvements that need to be made to ensure compliance. The letter will set out the timeframe within which these improvements must be completed. Failure to complete these improvements may lead to the exporter's ability to use the licence being suspended for a period of time.

8. The exporter may apply for Standard Individual Export Licences during the period of suspension. Suspension will not automatically prevent him from using another OGEL so long as he meets all its terms and conditions and that he has not received a letter suspending or revoking his ability to use that licence.
