

Fire – make your home safe

Easy Read

Fire – make your home safe

Did you know...?

- A smoke alarm could save you in a fire.
- 90 people die each year because their smoke alarm is not working.
- Most fires start when people are cooking.
- Every 3 days someone dies from a fire started by a cigarette.
- Broken electrics start about 7,000 fires a year.

Keep your home and family safe

- Get a smoke alarm.
- Put it up.
- Check it works.

Smoke alarms save lives.

Check your smoke alarm is safe

When you buy a smoke alarm, check it has these 2 marks:

Getting help to pick your smoke alarm

If you do not know which smoke alarm to choose, ask the fire station. They can help you.

Check your smoke alarm works

Each week, press the button on your smoke alarm to check it still works. If you press the button and there is no sound, change the batteries.

Change the batteries at the same time each year.

If your smoke alarm goes off by mistake, do not take out the batteries. Just wait for it to stop.

Put your smoke alarm in the right place

Do not put a smoke alarm in a kitchen or in a bathroom.

The best place is on the ceiling in a hallway. If your home has more than 1 floor, put a smoke alarm on each landing.

What if the smoke alarm starts beeping

If the smoke alarm starts making a beep – beep – beep sound, it is time to change the batteries.

Make sure fires do not start

People get hurt in fires and some die.

Follow the tips on the next pages to help stop fires in your home.

In the kitchen

Keep children out of the kitchen when you are cooking. They may knock over a pan and get hurt.

In the kitchen

Stay in the kitchen if you are cooking with fat.
Fat can set on fire easily.

If the fat gets too hot and starts to smoke,
turn off the cooker and leave it to cool.

Never put water onto hot fat.

Fire – make your home safe

Use plugs safely

If you put too many plugs in 1 socket it can start a fire.

1 plug in each socket is best.

This is **very** important for things that use a lot of electricity. For example, washers and electric fires.

Check for broken plugs and wires

Check for hot plugs or plugs with dark marks.
Check for wires that are loose or broken.

If you find any

- Take the plugs out of the socket.
- Get them looked at by an electrician.

Cigarettes

Cigarettes start a lot of fires. When you finish a cigarette, make sure it is **right out**.

Candles

Only use candles in a power cut.

Put candles in a holder.

Keep candles away from things that may burn.
For example, curtains and papers.

Think about how to get out safely

A smoke alarm will warn you about a fire.

Make sure you have a plan if your smoke alarm goes off.

These pages tell you how to make a plan.

Make a plan to get out fast

If your smoke alarm goes off, you must get out fast.

Make a plan for getting out. Tell your family about it.

Everyone should know where the keys are.

Keep things away from doors and windows.

Fire – make your home safe

Phone 999 for the fire service

Do not try to put out a fire yourself.

Phone 999 and ask for the fire service.

Be ready to tell them where you live.

If your clothes are on fire

Do not run about, it will make the fire worse.

Lie down and roll around. The fire will get smaller.
Use a coat to put out the rest of the fire.

Remember – stop, drop and roll.

What if you cannot get out

If you cannot get out of the house, go into one room. Then phone 999 and say which room you are in.

The fire service will tell you what to do and they will get there as fast as they can.

What to do if you are high up

If you are high up, do not use the lifts.
Do not go on the balcony.

If you can, go down the stairs.

Do these checks before you go to bed

A lot of fires start at night. Do some checks before you go to bed.

Look at the list of checks we have made.
It is on the next page.

Bed time checks

- ☒ Close all the inside doors.
Closed doors slow down a fire.
- ☒ Un-plug things that use electricity.
But not things like fridges and freezers.
- ☒ Check the cooker is off.
- ☒ Do not leave the washer on at night.
- ☒ Turn off heaters.
- ☒ Put a fire-guard around the fire place.
- ☒ Check the doors to the outside are clear.
- ☒ Put keys where everyone can find them.
