JSP 602: 1035 - Radio and Airwave

Outline

Description: This policy leaflet covers MOD policy regarding the use of O2 Airwave, specifically the naming conventions that shall be used when submitting Fleet mapping details. Airwave is a Public Safety Radio Service, conforming to the TETRA standard, being implemented by Airwave O2 Ltd across the UK Mainland on behalf of the Home Office police forces. Service roll out is on a force-by-force basis and will be completed by 2005. The DTI has granted a license for the MOD and other public safety organisations to use AIRWAVE and it is now MOD policy to take up the service where interoperability with the 'Blue Light' services is required.

Reasons for Implementation: The key benefits, to MOD, of compliance with the approach outlined in this policy are improved interoperability, especially between Service and Civilian agencies and a fully coordinated MOD approach, which will achieve the most cost effective take up of the AIRWAVE service.

Issues: None.

Guidance: This leaflet is outside the scope of both the e-GIF and the NC3TA.

Policy

| |

Compliance

| Stage | Compliance Requirements |
|------------------------------|---|
| Initial Gate/DP1 | MOD Projects shall submit a formal declaration that they have read and understood the policy and sought guidance from the SME(s). |
| Main Gate/DP2 | MOD projects shall declare they have mandated this policy in the SRD (and MODAF views). |
| Release Authority/DP5 | MOD projects shall make a formal declaration that they adhere to the Airwave conformance requirements. Where they do not adhere to the requirements, projects shall make a formal declaration of any deviations from these requirements and shall inform the DCSA DFNIPT of their deviations. |
