ABOUT JSP 886

PURPOSE

1. JSP 886 is a repository for Joint Support Chain (JSC) policy, processes and guidance. JSP 886 is intended to be used by Defence Equipment and Support (DE&S) and Front Line Command (FLC) logistic staff and, to a increasing degree, by Industry.

PRODUCTION, GOVERNANCE AND PUBLICATION

2. JSC policy branches write new or amend policy to accommodate the changing requirements within Defence. The draft policy is passed to one of the editorial teams, DES JSC SCM-PolComp-JSP886 (Supply Chain) or DES JSC TLS-PC5 (Support Engineering) to apply the corporate format and start the two stage governance process:

    a. Initially the policy is staffed to relevant JSC SMEs, Operating Centres and FLCs for Endorsement.

    b. The endorsed policy is then staffed to the membership of the Logistic Policy Working Group (LPWG) for ratification.

3. The policy is then published on the Defence Intranet and external MOD website.
